B.E - Sir M Visvesvaraya Institute of Technology,
Bengaluru 2025 | CGPA: 7.76/10

Internship

Varcons Technologies Pvt Ltd

Title: Full Stack Developer Intern

Objective: To gain hands-on experience in full stack web development and contribute to real-world projects while enhancing technical skills in modern web technologies.

Team Size: 4 members

Role: Full Stack Developer

Responsibilities:

- Designed and implemented a robust Resume Template using **HTML, CSS, and JavaScript**, simplifying the resume creation process for end users.
- Collaborated with a cross-functional team to develop scalable and efficient web solutions that align with user requirements.
- Regularly conducted code reviews to ensure adherence to best practices and delivered reusable components for future projects.

Technologies: HTML, CSS, JavaScript, Git, VS Code

Projects

Title: Animal Adoption System

Objective: To develop a web-based platform that connects potential pet adopters with animals in need of homes, streamlining the adoption process through an intuitive and user-friendly interface.

- Developed a web-based Animal Adoption System enabling users to view, filter, and adopt pets through an intuitive interface using technologies like **Django, HTML/CSS, and MySQL**.
- Implemented admin and user access for managing pet listings, adoption requests, and approval workflows, ensuring role-based access and secure data handling.

Title: Eshop Ecommerce Website

Objective: To create a fully functional e-commerce platform for cameras and earbuds with seamless user experience, secure transactions, and efficient product management capabilities.

- Developed a dynamic e-commerce website for cameras and earbuds using **Django, Python, HTML, CSS, and JavaScript**, ensuring cross-browser compatibility and mobile responsiveness.
- Integrated advanced product search, filtering by product names and type, and secure user authentication, boosting user engagement.
- Implemented modular frontend and backend architecture, improving maintainability and supporting seamless future scalability.

Title: Pavan Dairy Product Ecommerce Website

Objective: To build a specialized e-commerce solution for dairy products that provides customers with easy product discovery, secure ordering, and efficient inventory management for vendors.

- Designed and developed a dairy products e-commerce website using **Django, Python, HTML, CSS, and JavaScript**, ensuring mobile responsiveness and cross-browser compatibility.
- Integrated advanced product search, filtering by product names and type, and secure user authentication, boosting user engagement.
- Implemented smooth checkout and inventory management features, enhancing maintainability.
